

NS NIS PATIALA

SYLLABUS FOR DIPLOMA IN SPORTS COACHING

DISCIPLINE: SHOOTING

COURSE CODE: SH - 10

Course Framework

Total Credits: 24

Semester 1:

- a) Lectures (L): 50
- b) Assignment: 4
- c) Practical (P) / Self Work (SW) / Field Work (FW): 240
- d) Internal Assessment (IA): 30
- e) Total Credits: 12

1. Sport Main Content Theory - 1:

- Theory:4 Credits
- Marks Allocation:
 - o Internal: 30%
 - o External: 70%
- Total Hours:50
- Total Marks: 200
- Total theory modules: 7

2. Sport Main Content Practical - 1:

- Practical: 8 Credits
- Marks Allocation:
 - o Internal: 30%
 - o External: 70%
- Total Hours: 200
- Total Marks: 400
- Total practical modules: 7

Semester 2:

a) Lectures (L): 50hrs

b) Assignment: 4

c) Practical(P) / Self Work(SW) / Field Work (FW): 200

Hrs

d) Internal assessment: 30%

e) Credits: 12

f) Total theory modules: 7

g) Total practical modules: 7

Sport Main Content Theory- 2:

1) Theory: 4 Credits

2) Marks Allocation:

i. Internal:30%

ii. External: 70%

3) Total Hours: 50

4) Total Marks: 200

Sport Main Content Practical - 2:

1. Practical: 8 Credits

2. Marks Allocation:

i. Internal: 30%

ii. External: 70%

3. Total Hours: 200

4. Total Marks: 400

Specialization:

| Specialization | Lectures | Assignment | Practical / Range Work / Self work |
|----------------|----------|------------|---------------------------------------|
| | 25 Hrs | 2 | 100 HRS |

Assessments:

_

 Theory Assessments (Monthly): Total 4 Assessments – Each Semester

*Internal

 Practical /Lab / Field Work (Monthly) : Total 5 Assessments – Each Semester

*Internal

3. Monthly Quiz / Assignments : Total 4 Assessments – Each Semester

**Internal/External percentage: 40 % marks of internal assessment to be done on the basis of the marks scored in monthly assessment by adding all the score

- 4. Theory Exam : At the end of each semester *External
- 5. Practical Exam : At the end of each semester
 - * Internal/External percentage: 60 % of total score in Theory

Diploma in Sports Coaching Proposed Credit Structure

1st Semester

| S | Subject Description | Total | Allocation of | f Marks % | TOTAL |

| | (') | | | | 1100 |
| | Total | 22 | | | 1100 |

AT A GLANCE

Marks as per UGC guidelines are allotted as 50 marks per credit. Proposed marks therefore stand as follows: Sport Specific Content (Practical& Theory) - 24* 50 = 1200 Sports Science (Practical& Theory) - 14* 50 = 700 Coaching Dynamics - 2*50 = 100 Professional Development - 2*50=100 Digital Learning - 1*50=50 Internship & Project - 3*50=150 Total ------2300 1 Credit X 15 Hours

COURSE OBJECTIVES:

- 1. To impart knowledge and develop the concept of coaching skills in Shooting
- 2. To demonstrate an awareness and understanding of the concept of quality coaching and associated pedagogical aspects of coaches' work for high performance.
- 3. To demonstrate an awareness and understanding of coaches' role in the learning of Athletes.
- 4. To demonstrate an awareness, vision and understanding of the centrality of learning to coaching practice and its implementation practically.
- 5. To equip them with knowledge of collecting, analysing and organizing information, concepts, ideas and to convey those ideas clearly those ideas clearly and fluently, both theoretically and practically in coaching.
- 6. To understand the knowledge and respect of ethics and ethical standard in relation to organization of session effectively and efficiently.
- 7. To enable them to demonstrate adequately and understand what to Observe in the players' performance
- 8. To develop a concept of realistic coaching and training in reference to modern trends in soccer.

LEARNING OUTCOMES:

- 1. Identify the basic concept, pedagogy and coaching philosophy to be a successful coach in shooting
- 2. Impart technical and tactical knowledge of teaching and coaching skills in the Shooting
- 3. Prepare coaches to understand the systematic preparation of athletes at various levels in shooting
- 4. Demonstrate the ability to develop the individual skills of the shooting players.
- 5. Develop an effective planning and programming of coaching sessions in Pistol / Rifle / Shotgun shooting

SKILLS DEVELOPED:

- 1. Leadership
- 2. Logical and critical reasoning
- 3. Decision making
- 4. Effective communication
- 5. Problem solving approach
- 6. Coaching ethics

COURSE OBJECTIVES:

- ➤ To demonstrate an awareness and understanding of the concept of quality coaching and associated pedagogical aspects of coaches work for high performance.
- > To demonstrate an awareness and understanding of coachesrole in the learning of Athletes.
- ➤ To demonstrate awareness, vision and understanding of the centrality of learning to coaches practice and its implementation practically.
- ➤ To make enable to collect, analyse and organize information, concepts, ideas and convey those ideas clearly and fluently, both theoretically and practically in coaching.
- ➤ To understand the knowledge and respect of ethics and ethical standard in relation to organization of session effectively and efficiently.
- ➤ To enable them to demonstrate adequately and understand what to observe in the players' performance.
- ➤ To develop a concept of realistic coaching and training in reference to modern trends in shooting.

LEARNING OUTCOMES:

Enable the students to understand the concept of coaching philosophy

- > Enrich the student with knowledge to achieve peak performance
- > Ability to develop scientific thinking to enhance Shooting Skills
- Skilled with planning and programming of coaching session efficiently and effectively

SKILLS DEVELOPED:

- > Understand science as well as art of coaching
- > Leadership qualities
- Critical thinking
- Decision making
- > Effective communication

Rifle Topics

Theoretical contents

The rifle discipline will cover technical analysis in rifle shooting and the basics of shooting positions in:

- Shooting positions
- Standing Prone
- Kneeling
- 1. Biomechanics analysis of the position
- 2. Feet, legs and hips position
- 3. Position of the back and shoulders
- 4. Left arm and elbow position
- 5. Right arm position
- Position of the head
- Position of the butt plate in the shoulder and length of the rifle stock
- 8. Body balance, rifle balance & balance system shooter-rifle
- 9. Various position modifications in relationship with body constitution of the shooter
- 10. Position and size of the shooting cushion
- 11. Length of the sling
- 12. Differences in position between AR and FR
- 13. Aiming & Sighting Technique Standing, Prone & Kneeling
- 14. Triggering Technique Standing, Prone & Kneeling
- 15. Breathing Technique— Standing, Prone & Kneeling
- 16. Shooting in different weather conditions
- 17. Weapon maintenance

Practical activities in the field based on the above theoretical contents

- 1. Methodology of approaching and taking shooting position Standing
 - Prone
 - Kneeling
- 2. Establishing middle line of position
- 3. Establishing" Zero Point" in the middle of the target
- 4. Position correction, for each position
- 5. Correction of the sighting elements on the rifle & sling corrections
- 6. Exercises for developing basic shooting skills
- 7. Work with beginners—didactical approach, siting position, standing position with support
- 8. Developing Shooting School System
- 9. How to aim
- 10. Size of the ring and opening of the blend
- 11. Approaching center of the target
- 12. Grip and gripping
- 13. Aiming Breathing coordination
- 14. Detecting critical point based on shot group
- 15. Detecting critical points based on rifle recoil
- 16. Corrections of the most common mistakes
- 17. Tactics in shooting
- 18. Shooting diary
- 19. Use of optoelectronic equipment
- 20. Weapon and ammo testing

Pistol Topics

Theoretical contents

The Pistol shooting technique describes the position for Air Pistol, Sport Pistol and Rapid Fire Pistol. For each discipline, the techniques are explored in great detail focusing on the biomechanical requirements and analysis, as well their advantages and disadvantages. The course will also cover the gripping technique of the pistol in depth.

- 1. Requirements for building a correct shooting stance 2. The leg position
- 2. The body position

- 3. The arm & hand positions
- 4. The head position
- 5. The gun gripping technique
- 6. Vertical movement to target (for precision disciplines and SP RF)
- 7. Horizontal movement with transition (RFP)
- 8. Sighting techniques for precision disciplines
- 9. Sighting techniques for SP RF
- 10. Sighting techniques for RFP (vertical and horizontal)
- 11. Triggering techniques for each discipline (precision and dynamic)
- 12. Follow through
- 13. Shooting in different weather conditions
- 14. Weapon maintenance

Practical activities in the field based on the above theoretical contents

- 1. Methodology of approaching and taking shooting position
 - o Air Pistol
 - o Sport Pistol
 - Rapid Fire Pistol
- 2. Establishing middle line of position
- 3. Establishing "Zero Point" in the middle of the target
- 4. Position correction, for each discipline
- 5. Corrections of the grip, and proper grip fitting
- 6. Exercises for developing basic shooting skills
- 7. Work with beginners—didactical approach, siting position, standing position with support
- 8. Developing Shooting School System
- 9. How to aim and sight
- 10. Approaching center of the target
- 11. Grip and gripping
- 12. Detecting critical point based on shot group
- 13. Corrections of the most common mistakes
- 14. Tactics in shooting
- 15. Shooting diary
- 16. Use of optoelectronic equipment
- 17. Weapon and ammo testing

Shotgun Topics

Theoretical contents

The shotgun shooting technique looks at the development of the Ready position for both Skeet and Trap. A detailed analysis of the necessary requirements to successfully produce an efficient Ready Position.

- 1. The shooting stance
- 2. The body position
- 3. The arm & hand positions
- 4. The head position
- 5. The gun hold positions
- 6. The eye hold positions
- 7. Initial movement to target
- 8. Transition phase of movement
- 9. Sight Picture
- 10. Triggering
- 11. Post-Shot Actions
- 12. Shooting styles

Practical activities in the field based on the above theoretical contents

- 1. Methodology of approaching and taking shooting position
- 2. Position correction, for each discipline
- 3. Corrections of the shotgun grip, and proper gun fitting
- 4. Exercises for developing basic shooting skills
- 5. Work with beginners didactical approach, skeet position, trap position
- 6. Developing Shooting School System
- 7. How to determine when to move to the target
- 8. Good and bad components of different styles
- 9. Shooting in different weather conditions
- 10. Corrections of the most common mistakes
- 11. Tactics in shooting
- 12. Shooting diary
- 13. Use of video equipment 8. Ammo testing

DISCIPLINE: STRENGTH & CONDITIONING

COURSE CODE:

| | | L | Assignment | P/FW | SW | TOTAL CREDIT UNITS |
|------------------|-----------------|---------------|-----------------|----------|-------------|-----------------------|
| Total Credits:01 | Semester - I | (L-Lecture, P | -Practical,SW-S | Self Wor | k, FW-Field | i Work) |

COURSE OBJECTIVES

For the coaching profession, a thorough knowledge of conditioning is essential because the performance of most of the Olympic events depends on high level of physical fitness. This subject will provide adequate technical information and skill to the coaches for designing appropriate programmes for the development of various fitness components. Moreover, they will have proper idea of organizing training programmes and planning/periodizing the training. In addition to this, the coaches will have clear idea of test measurement and evaluation and monitoring of training process.

LEARNING OUTCOMES

After learning this subject, the students will get proper idea of strength and conditioning and will be able to design different programmes for strength and conditioning.

SKILLS DEVELOPED

- ❖ Achieve proficiency in different exercise execution.
- Achieve adequate skill for the selection of appropriate exercise suitable for different sports discipline, age group and different phases of training programmes

DISCIPLINE: EXERCISE PHYSIOLOGY

COURSE CODE:

| | | L | Assignment | P/FW | sw | TOTAL CREDIT UNITS |
|---------------------|-----------------|---------------------|-------------------|----------|-----------|--------------------------|
| Total Credits:02 | Semester - I | | | | | 02 |
| Orcuits.02 | | (L-Lecture Work) | e, P-Practical,SW | /-Self W | ork, FW-l | Field |

COURSE OBJECTIVES

- ❖ To understand the basic idea of different systems of human body.
- To understand the physiological basis of training, acute responses and chronic adaptations of various systems.
- To know about different energy systems and their contributions to

- different types of activities in various sports and games.
- To understand different environmental influences on training and performance under different climatic conditions.
- To acquire basic knowledge of training to young children and the important physiological considerations.
- To know about gender difference in performance
- To know about hormonal changes due to exercise

LEARNING OUTCOMES

- About the functioning of different systems
- About the functional changes of different systems during excise and after training
- How to develop different aerobic and anaerobic quality by understanding the involvement of different energy system for different types of activity
- About environmental influence on training
- How to assess different physiological parameters like Heart rate, strength, Oxygen consumption and their practical implications

DISCIPLINE: BIOMECHANICS

COURSE CODE:

| | | L | Assignment | P/FW | sw | TOTAL CREDIT UNITS | |
|----------------|-----------------|--|------------|------|----|--------------------------|--|
| Total Credits: | Semester - I | | | | | | |
| | - | (L-Lecture, P-Practical,SW-Self Work, FW-Field Work) | | | | | |

COURSE OBJECTIVES

- To learn about fundamentals of defining joint movements in different planes and axis.
- To give an overview of major muscles acting at various joints
- ❖ To introduce and understand of the core concepts of biomechanics

- & kinesiology in relation to sports action through a combination of theory and practicals.
- To understand the difference between qualitative and quantitative analysis of sports movements

LEARNING OUTCOMES

- Describe the basic movement patterns and joints involved in respective sports actions and exercises.
- Identify major muscles acting at particular joints in a particular sports action
- Perform qualitative analysis of sports movements

SKILLS DEVELOPED:

They would be able to identify the muscles acting at joints and describe basic movement patterns related to sports and exercises.

DISCIPLINE: SPORTS MEDICINE

Course Objectives

- ❖ To teach about various types of sports injuries including their causes, mechanism, first aid management and rehabilitation.
- ❖ To give an overview of general concepts of physiotherapy and its role inmanagement of sports injuries.
- To teach various recovery methods used in sports and their applications.
- ❖ To enable the students understand about various ergogenic aids, doping relatedissues and anti-doping education.

Learning outcomes

- To be able to identify various risk factors for sports injuries and formulateappropriate prevention strategies.
- ❖ To be able to identify injuries on ground and to perform on ground first aid andmanagement of sports injuries.
- ❖ To be able to implement and supervise rehabilitation protocols on injured athletesbefore return to play.
- To be able to effectively utilize various recovery methods in sports training.
- To know about various issues related to doping and develop the culture of dopefree sport.

PROPOSED SYLLABUS OF SPORTS ANTHROPOMETRY FOR DIPLOMA IN SPORTS COACHING

Course Name: Sports Anthropometry

Course Credit: 01

| L | Т | Р | SW/FW | TOTAL CREDIT |
|----|---|----|-------|--------------|
| 12 | 0 | 06 | 0 | 01 |

Course Objectives:

- 1. To gain an understanding on the application of anthropometry in growth, nutrition and performance.
- 2. Human growth and development unit will help students comprehend, how changes that accompany human growth affect skill, exercise tolerance, injury potential of an individual overtone.
- 3. Describe theoretical views on body composition and its role in sports participation, recommended methods for body composition assessment.
- 4. To obtain hands-on experience and basic training in common anthropometric measurements.

Learning Outcomes: By the end of the course, the students will be able to-

- 1. Understand the application of anthropometry in sports.
- 2. Understand the changing aspect of human growth and its role in training.
- 3. Find out the indicators of an athlete health and fitness, its correlation with nutrition and performance.
- 4. Comprehend the importance of indices for talent identification.
- 5. Correlate physique and performance in sports.

6. Obtain standardized technique of measurements.

Skills Developed:

- 1. Knowledge of which parameters to be assessed at a given age, training phase of an athlete.
- 2. Take basic anthropometric measurements.

Readings:

- 1. Kinanthropometry and Exercise Physiology (4th Edition) Manual by Roger Eston and Thomas Reilly, 2019
- 2. Handbook of Research for Biomechanics & Anthropometry in Sport Science by Zahra Hojjati Zidashti , Soheila Yavarmasroor , Kaveh Hariri Asli, 2017
- 3. Best Practice Protocols of Physique Assessment in Sport by Patria A. Hume, Deborah A. Kerr, Timothy R. Ackland, 2018

THEORY:

| Unit No/Description/Topics Covered | Teaching Method | No. of Hours (Period) | Online /Class room | Faculty Description |
|---|--------------------|-----------------------------|--------------------------|------------------------|
| Unit -1: Kinanthropometry Introduction and Application of Kinanthropometry in sports | L | 02 | Online | In house* |
| Unit 2: Human Growth and Development Meaning of growth and stages of Human Growth Adolescent growth spurt: its effect on training Growth curve, Determination of Velocity and Distance Curve Concept of maturity: early, average and late mature Developmental age, and role of developmental age in | L | 04 | Online | In house* |

| Unit 3: Body composition | L/T | 03 | Online/ | In house* |
|--|------------|-------|-----------|-----------|
| Introduction, factors influencing body composition Body composition as a health and fitness indicator in sports Methods to estimate human body composition Determination of body composition: muscle mass, bone mass and fat mass | | | classroom | |
| Unit 4: Concept of Physique | L | 03 | Online | In house* |
| &Somatotype | | | | |
| Physique:a. Introduction | | | | |
| b. Physique in different sports and Games | | | | |
| Somatotype a. Different components, importance and | | | | |
| scope in sports | | | | |
| b. Heath and Carter's method of | | | | |
| somatotyping | | | | |
| c. Plotting of Somatotype chart | | | | |
| Tea | ching hour | s: 12 | | |

PRACTICAL:

- 4. Dr. Athoni Rhetso (JSO, Bangalore)

Assessment

| | Sports Anthropometry INTERNAL (TOTAL MARKS=15, 1 credit) | | | | | |
|---------------|--|--|----------------------------|--|--|--|
| Semester 1 | Theory | 1st MCQ test (after completion of 1st & 2nd unit)- 04 marks (1*4) 2nd MCQ test (after completion of 3nd & 4nd unit)- 04 marks (1*4) | Written/online examination | | | |
| | Practical | Practical viva-voce (after completion of the syllabus)-07 marks (1*7) | | | | |

DISCIPLINE: BIOCHEMISTRY & NUTRITION

COURSE CODE:

| | | L | Assignment | P/FW | SW | TOTAL CREDIT UNITS |
|---------------------|-----------------|--------------------|-------------------|----------|---------|--------------------------|
| Total Credits:01 | Semester - I | | | | | 02 |
| | | (L-Lectur Work) | e, P-Practical,S\ | W-Self W | ork, FW | -Field |

COURSE OBJECTIVES

- Basic understanding regarding macronutrients and micronutrients and their specific role in sports
- Understanding regarding sports specific issues such as hydration,

- weight control, supplements etc.
- Identifying and calculating nutritive values of raw, cooked and packed food
- Scrutinizing sport nutrition related information available on internet
- Basic understanding of Exercise biochemistry and its application in sports
- To instruct more about the use of biochemical parameters in understanding the sports training related adaptations
- Basic idea about exercise metabolism, fuel utilization during exercise.
- To elucidate the mechanisms of fatigue and best recovery modes during different exercise protocols

LEARNING OUTCOMES

- At the end of course the coaches will be able to understand the principles of nutrition to maintain health and enhance recovery process
- The coaches will also be able to apply the nutrition knowledge into field situations
- Better understanding about the application of exercise biochemistry for health and nutritional monitoring of athlete
- Coaches will get clear picture about the importance of biochemical parameters in monitoring the adaptations of sports training,

DETAILED SYLLABUS - SEMESTER I THEORY PAPER No. of Online Faculty **Teaching** Unit **Description/Topics Covered** Hours /Class Method **Description** No (Period) room Sports Biochemistry: 1 01 Definition, Aim and importance, Exercise Metabolism (Anabolism and Catabolism) Storage of fuels in the body, 01 relevance of carbohydrates and lipids for sports and Exercise. SYLLABUS FOR DIPLOMA IN SPORTS COACHING COURSE

DISCIPLINE: SPORTS PSYCHOLOGY

COURSE CODE:

| | | L | Assignment | P/FW | sw | TOTAL CREDIT UNITS |
|---------------------|-----------------|--------------------|-------------------|----------|---------|--------------------------|
| Total Credits:01 | Semester - I | | | | | 02 |
| | | (L-Lectur Work) | e, P-Practical,SV | W-Self W | ork, FW | -Field |

COURSE OBJECTIVES

To demonstrate understanding of theoretical foundation of the psychological processes that influence human performance in

- Sports settings.
- To identify and apply psychological techniques and strategies to enhance performance in Sports.
- ❖ To evaluate research in Sport Psychology and psychological factors related to performance and participation in Sport and Exercise settings.

LEARNING OUTCOMES

- To enable the coaches to develop an understanding of various psychological traits and mental states of individual players in different situations.
- To inculcate in them the confidence to apply appropriate psychological tools and techniques on players according to their needs and requirements.
- To develop in them the interest and curiosity to be aware of themselves and their athletes and to nurture the athlete in a manner as to bring out their best potential.
- Evaluate the effectiveness of their work with athletes in Sport, Exercise, and Performance Psychology

COURSE OBJECTIVES

- To provide the knowledge and understanding of Coaching Concepts in sports coaching.
- ❖ To enable the trainee Coaches to do self-reflection and work out the coaching effectiveness and philosophy for each individual coach.
- ❖ To make the trainee Coaches aware of the behavior and relationships required for becoming effective Coaches.

LEARNING OUTCOMES

- The trainees will be able to approach sports coaching with their own philosophy.
- The trainees will be able to differentiate between teaching and coaching and will be aware of the basic principles of Coaching.
- ❖ To develop the understanding of the Coaching process and to be able to carry out athlete managements and developments.
- ❖ To acquire the knowledge of planning coaching sessions.
